About This Game

Dream Channel is a 'choose your own adventure' VR series about gangsters who buy and sell dreams on the black market. Players enter a VR world (The Dream Channel) and soon discover that their dreams have been stolen too! The starting sector for the story is the DJ sector where DJs play sets from the virtual night clubs - seamlessly monetised using Gaze Coin.

To gain access to the world you will also need to download the free Gaze Coin app from Google Play or the App Store, setup your wallet and then use it to scan the QR code and gain access to the world. Your wallet can then be used to earn gaze coins as you explore the Dream Channel sectors.

Features include

- A unique Gaze based navigation system where teleporting becomes optional. Instead you can simply look toward the direction that you wish to travel and then you will start to move in that direction after a short moment. The same applies to entering apartments - Just look at an apartment to enter it.

-
- Pressing the trigger on a Vive controller activates an arc teleporter system. You can use this as an alternative to gaze based teleportation or as a way to speed it up.
 - As you walk around the streets you will hear music and sounds around you which will change as you get closer to various apartments. This feature will help guide you to the style of music and content that appeals to you the most.
 - The names of apartments that you have not yet visited will be overlaid to help guide you toward new content and complete missions. Head to the DJ Sector if you are a music lover and to Riot Kittens for a completely unique choose your own adventure experience.
